Jim Doyle, Governor
Cory L. Nettles, Secretary

Wisconsin Department of Commerce Bureau of PECFA

Bid Document

SECTION 1 - Scope of Work:

The Bureau of PECFA is seeking competitive bids to perform remedial action services on a petroleum release from a regulated petroleum product storage tank system. This bid is through a specified work scope. The site upon which bids are being solicited is:

Bid Round Number: 30
Comm Number: 53536-1163-65-A
BRRTS Number: 02-54-150621
Site Name: UC Bulk Facility
Site Address: 65 Union St Evansville WI

Project Manager: Jim Kralick
Project Manager address: 2514 Morse St Janesville WI 53545
Project Manager phone: 608-743-4841
Project Manager e-mail address james.kralick@dnr.state.wi.us

Bid Announcement Date	2/16/04
Questions or requests for information must be submitted in writing and received by:	3/1/04 4:00 PM
Responses to the questions will be posted (and if requested, sent in writing) by:	3/19/04
Bid End Date and Time:	4/2/04 by Noon

The case file including report(s) and other pertinent information upon which bids are being sought, and the qualified bid response, when determined, are available for inspection at:

Department of Natural Resources, 2514 Morse St, Janesville WI

Please contact the project manager listed above for an appointment.

Copies of report(s) and other pertinent information may be available for purchase at the location listed below. If pertinent information is not available, please contact the project manager.

Kinkos-Madison, 654 W Washington Ave, Madison WI 53703

Phone: 608-255-6367

Fax: 608-255-8661

SECTION 2 – Site-Specific Bid Specification Requirements:

A) Project Manager Comments

1) General Comments:

The site is a former bulk petroleum storage facility, with eight former ASTs ranging in size from 8,000 gallons to 22,000 gallons that contained leaded and unleaded gasoline and diesel fuel. The site was operated until some time in 2001 and the ASTs were removed from the site some time in 2003. A site investigation was begun in 1998. The stratigraphy across the investigated area consists of 1 to 5 feet of sandy fill, underlain by alternating silty clay, silty sand, and silty gravel layers which extend to a depth of approximately 10 to 15 feet below ground surface (bgs). The unconsolidated sediments are underlain by dolomite bedrock down to ~42 feet bgs, the maximum depth explored. Soil contamination exceeding NR720 generic residual contaminant levels, NR746 Table 1 values, and/or NR746 Table 2 values has been reported present in the upper 4 feet of the soil column, primarily within the earthen dike area that formerly contained the ASTs. The extent of shallow soil contamination has not yet been defined in that area. The static water table is present beneath the site at between 4 and 6 feet bgs. Monitoring wells MW1, MW2, MW4, and MW5 are all installed with their screened intervals intersecting the unconsolidated/dolomite bedrock interface. Monitoring well MW3 is screened entirely within unconsolidated material. Piezometer PZ2 is installed entirely in dolomite bedrock. The extent of groundwater contamination at the water table has not yet been defined. The horizontal hydraulic gradient across the site is generally flat. Groundwater flow is influenced by a nearby creek that borders the contaminant source area to the north and west, and a specific flow direction has not yet been established. It is likely that groundwater periodically flows to the north and west, toward the creek, but also periodically flows to the south and east, away from the creek.

Please note that claim preparation costs will not be a part of the cost cap established by this bid. These costs (\$500 maximum per claim submittal) are still eligible for PECFA reimbursement and Commerce encourages timely claim submittals at appropriate milestones. Therefore, bidding consultants should not include claim preparation costs in their bid responses.

2) The following Environmental Factor(s) were identified in the Site Investigation Report for this site:

- ☒ Documented expansion of the plume margin.
- ☐ Verified contaminant concentrations in a private or public potable well that exceeds the preventive action limit established under ch. 160, Stats..
- ☒ Contamination within bedrock or within 1 meter of bedrock.
- ☐ Petroleum product that is not in the dissolved phase is present with a thickness of .01 feet or more, and verified by more than one sampling event.
- ☐ Documented contamination discharges to a surface water or wetland.

3) Minimum Remedial Requirements:

1. Install one additional monitoring well to define the extent of groundwater contamination at the water table to the southeast of MW2. Air rotary drilling will be required. The new well shall be installed to an approximate depth of 15 to 16 feet bgs and have a 10-foot well screen. The new well will be labeled as MW6. MW6 shall be installed approximately half way between former Geoprobe™ borings GP7 and GP8, as depicted on site plans drafted by the former consultant (this location is approximately 45 feet southeast of well MW2 and 45 feet northeast of MW1). The installation documentation for this well shall be included in the site investigation report addendum, as described in Item #6 below. The bid shall include costs for disposal of all solid and liquid waste generated during the installation of MW6. **MW6 must be installed within 60 calendar days of the date that the contract is signed with the selected consulting firm, or the contract will be terminated.** DNR will respond to any requests for additional information regarding the installation of MW6 within 14 calendar days of receiving such a request, and any time spent waiting to receive a response from DNR will not be counted toward the 60 calendar day time limit.
2. A minimum of 6 additional soil borings shall be installed within the earthen dike area that formerly contained the ASTs to define the extent of remaining shallow soil contamination. The exact locations of the additional soil borings will be left to the discretion of the contracted consultant, with the understanding that they should be installed outside the perimeter of the already identified shallow soil contamination plume as defined by borings HA-1 through HA-7. Two soil analytical samples shall be collected from each soil boring, at the 0- to 2-foot and 2- to 4-foot intervals. All soil samples shall be analyzed for PVOCs, PAHs, and lead. **The additional soil borings must be installed within 60 calendar days of the date that the contract is signed with the selected consulting firm, or the contract will be terminated.** DNR will respond to any requests for additional information regarding the installation of the additional soil borings within 14 calendar days of receiving such a request, and any time spent waiting to receive a response from DNR will not be counted toward the 60 calendar day time limit.

3. All existing and newly installed wells and piezometers shall be surveyed to the national geodetic survey datum, per the requirements of s. NR141.065(2). All existing site features including on-site and off-site buildings, property boundaries, roads, and all nearby potential receptors of contamination (primarily private potable wells) shall also be surveyed in and a revised site plan shall be submitted with the final report. In addition, a map depicting all potential receptors of contamination (potable wells) within a 500-foot radius of the contaminant source area shall be drafted and submitted with the final report described in Item #6.
4. The hand pump water well located along the eastern property boundary shall be sampled for PVOCs and then abandoned.
5. Groundwater monitoring shall be conducted for two consecutive quarters and shall follow the protocol of the following table:

Wells	Sample Quarterly
MW1, MW2, MW3, MW4, MW5, PZ2, MW6*	PVOCs, PAHs, RNA**

*Newly installed wells MW6 should be sampled for VOCs during the first round of sampling, and PVOCs after that.

**Remediation by Natural Attenuation parameters. Bidders should follow the recommended RNA parameter list and monitoring schedule found on TABLE 3-1 of the Wisconsin Department of Natural Resources *Interim Guidance on Natural Attenuation for Petroleum Releases*, PUB-RR-614, October 1999.

Quarterly groundwater monitoring must begin within 30 calendar days of the completion of the well installation described in Item #1 above, or the contract for providing these services shall be terminated. DNR will respond to any requests for additional information regarding quarterly groundwater monitoring within 14 calendar days of receiving such a request, and any time spent waiting to receive a response from DNR will not be counted toward the 30 calendar day time limit.

The bid shall include costs for disposal of all groundwater monitoring waste generated.

6. A brief site investigation report addendum shall be submitted to include tabulated results for all historical groundwater analytical results collected during the site investigation, tabulated historical and new soil analytical results, tabulated groundwater elevation data, and a determination of vertical hydraulic gradients between the shallow water table aquifer and the underlying dolomite aquifer. Groundwater flow direction shall also be calculated for the water table aquifer and presented on site plans for each groundwater-sampling event. A revised site plan depicting all existing site features including on-site and off-site buildings, property boundaries, roads, and all nearby potential receptors of contamination (primarily private potable wells) shall also be submitted with the final report. In addition, a map depicting all potential receptors of contamination (potable wells) within a 500-foot radius of the contaminant source area shall be drafted and submitted with the final report. Site plans depicting the extent of existing soil and groundwater contamination shall also be submitted. The site investigation report addendum shall be submitted to both WDNR and

Commerce within 30 calendar days of receiving the final laboratory analytical data, or the contract for providing these services shall be terminated. DNR will respond to any requests for additional information regarding quarterly groundwater monitoring or the final report within 14 calendar days of receiving such a request, and any time spent waiting to receive a response from DNR will not be counted toward the 30 calendar day time limit.

B) Bidder's Strategy for Remedial Action

- 1) Identify the remedial strategy for a specified work scope.
- 2) Specifically describe what element of your proposed strategy will address the environmental factors/risk factors listed above. Also describe how, when, and why it will address them.
- 3) Provide a detailed description of the work to be performed. The description shall provide sufficient detail to establish that the proposed strategy will be successful in achieving a specified work scope identified above.
 - a) The detailed description may include, but is not limited to the following:
 - Technologies
 - Estimated years of operation
 - Estimated tons of soil
 - Approximate geometry/depth of excavation
 - Reporting details
 - Estimated years of monitoring
 - Frequency of sampling/number of wells/parameters
- 4) Specifically describe how you will address off-site contamination, if applicable.
- 5) Specifically describe how you will address any direct contact hazards, if applicable.

SECTION 3 - Conditions of Bid:

The successful bidder will be the entity that complies with all provisions of the bid specification and provides the lowest total cost, excluding interest and claim preparation costs, for the site-specific bid specification requirements described in Section 2. PECFA funding under s. 101.143, Stats., will terminate when the responsible agency determines that institutional controls and notices, if utilized, would achieve a closed remedial status. PECFA funding will terminate regardless of whether the responsible party or other properties accept an institutional control and notices as required under §NR 726 Wis. Admin. Code. In preparing the bid, the bidder must assume compliance with all applicable codes, including but not limited to §Comm 46, §Comm 47, and §NR 700 Wis. Admin. Codes.

The successful bidder will be determined based upon conformance to and competitiveness under the bid protocol. The first determination will be whether the bidder has complied with all provisions of the bid. These bids will be considered responsive. From the responsive bids, the lowest total cost bid with an approvable approach to a specified work scope will be determined. Claim preparation costs will not

be a part of the cost cap established by this bid. These costs (\$500 maximum per claim submittal) are still eligible for PECFA reimbursement and Commerce encourages timely claim submittals at appropriate milestones. Therefore, bidding consultants should not include claim preparation costs in their bid responses.

The successful bid will be available to be viewed at the location identified in Section 1. If two or more bidders tie in the cost comparison, the bid with the lowest consulting cost will be used as the tiebreaker. All bid documents must be signed and sealed by a Professional Engineer, Professional Geologist, Hydrologist or Soil Scientist licensed by the State of Wisconsin Department of Regulation and Licensing.

The Department reserves the right to reject any and all bids that meet any of the following conditions:

- The Department believes the remedial strategy is not appropriate to a specific geologic setting.
- From the standpoint of program operations or regulatory responsibility, the Department determines it is in the best interest of the program to not accept any or all bids.

Any proposed technology or methods used in the remediation must be allowed for use in the State of Wisconsin and approvable by the Department with jurisdiction (Natural Resources or Commerce).

The name of the successful bidder, bid amount, proposed outcome and supporting documentation will be provided to the site claimant along with instructions to inform the PECFA program in writing of their intent to either:

- Use the lowest identified bidder or
- Use another service provider.

In either case, PECFA reimbursement is capped at the dollar amount of the successful bid.

A successful bid does not mean or guarantee that all costs in a resultant claim are eligible, reasonable, necessary or reimbursable under the PECFA program.

If a bidder fails to comply with a bid provision the bid response will be determined to be non-responsive. If the bid response is responsive, but not the lowest cost service provider with an appropriate approach, it will be determined to be “non-successful.” Non-responsive and non-successful bidders will not be individually informed of their failure to achieve compliance with the bid specifications or to be the lowest bidder.

The successful bidder may be required to provide input to, and attend a meeting with the PECFA program and the claimant to explain the bid and the remedial approach.

Appeals, by bidders, of decisions regarding complying bids or costs are not allowed, as they do not constitute claimant reimbursement decisions under the PECFA program.

In compliance with this invitation to bid and subject to all conditions thereof, the signatory agrees to the following:

- If the signatory's bid is determined to be successful, the signatory must, within 15 days of the Department's notification, contact the claimant and confirm that they will provide the remedial services at the cost described within the Bid Response.

- That for a period of 90 days, starting with the Department's notification to the claimant, the signatory will hold firm their commitment to provide the remedial services and prices set forth in the Bid Response.

Failure to abide with the conditions stated above may result in exclusion from future PECFA Public Bidding events.

Questions, answers and interpretations will be considered an amendment of this solicitation. All answers and interpretations shall be in writing from the Program Manager identified in Section 1 of this solicitation. Neither the program nor the Department shall be legally bound by any amendments or interpretations that are not in writing. Bidders are not to contact other personnel located within the Department of Commerce/Bureau of PECFA concerning the site or the bid solicitation between the Bid Announcement Date and Bid Ending Date. After the date by which questions must be submitted by, identified in Section 1, no further questions will be addressed.

A written response will be provided at: <http://www.commerce.state.wi.us/ER/ER-PECFA-SiteBidding.html> (and mailed to all requesters of the bid package who are not able to access the web site, and who therefore request written correspondence from the program contact).

SECTION 4 - Closure Specifications – If Applicable:

A bid submitted must provide the total cost, excluding interest but including all closure costs, for the remediation up to approval as a closed remedial action status identified below:

Unrestricted Closure
Closure with a NR 140 exemption
Closure with GIS Registry*
Closure with deed notice*
Closure with deed restriction*
Closure with NR 720.19 soil standards

Performance based NR 720.19 closure
Closure with site-specific conditions
Closure under NR 726.07
Closure under Comm 46/NR 746
Mass reduction

** **Note:** PECFA funding under s. 101.143, Stats., will terminate when the responsible agency determines that institutional controls and notices, if utilized, would achieve a closed remedial status. PECFA funding will terminate regardless of whether the responsible party or other properties accept an institutional controls and notices as required under NR 726. PECFA eligible costs may include all closure costs, up to approval as a closed remedial action (i.e. monitoring well abandonment) that are otherwise eligible for reimbursement.*

If the PECFA maximum award for the site/occurrence is not believed to be adequate to remediate the site/occurrence to a closed or no further remedial action status, that belief must be specifically noted in the bid and the remedial effort that will be achieved by the bid amount. For the purpose of the competitive bid the contaminant mass is determined to be: **Not Applicable**. The basis for specifying the progress shall be contaminant mass reduction and be based upon the mass reduction at the following points on the site:

Not Applicable

If the site is reasonably expected to exceed its cap under the PECFA program, bidders may propose mass reduction, the lowest bidder will be determined on the basis of a cost per mass reduction ratio. If some bidders propose mass reduction and others

propose costs to bring the site to a closed remedial action or no further action status, selection will be from those bidders proposing a closed or no further action result.

SECTION 5 - Instructions to Bidders:

By submission of a bid, bidder agrees that during the period following issuance of this solicitation and prior to notification of successful bidder, bidders shall not discuss the bid or bid process except with the program contact designated in this solicitation. Bidders shall not discuss or attempt to negotiate with the claimant, other potential bidders or program staff any aspects of the bid without prior approval of the Project Manager specified. Infractions will result in rejection of the violator's bid and may also result in disqualification of the individual to provide bids and a formal complaint being lodged with the Department of Regulation and Licensing.

The bid submitted shall address all the site specific bid specification requirements identified in Section 2. The bid shall support in detail the strategy to achieve a specified work scope, or remedial mass reduction goal if applicable. A full remedial action plan is not required as part of the bid submittal. A full remedial action plan may be requested by the program.

If access to the site is necessary for the preparation of a bid, access shall be arranged through the Project Manager. If the Project Manager is not able to arrange site access, this fact will not delay the bid process or negate the comparison and potential selection from among the bids that are submitted. All costs associated with a site visit or preparation of a bid will be the responsibility of the bidder.

The Bid Process must conform to the following:

1. If applicable, the closed remedial or no further action status to be achieved must be stated using the options available from the list provided in Section 4.
2. Indicate in the Bid Response a contaminant mass reduction proposal if the PECFA maximum award is not believed to be adequate to remediate the site/occurrence.
3. The Bid Response shall address all the site specific bid specification requirements identified in Section 2 and shall support in sufficient detail and succinctly the remedial strategy.
4. The total cost (in dollars) to accomplish the stated remedial goal, including all fees, reporting cost, pre and post closure costs and costs for establishing restrictions or institutional controls but, excluding claim preparation costs, interest, and investigation costs.
5. The costs specified in #4 shall separately identify consulting (non-commodity) costs.
6. The submittal must include an original and two (2) copies of the Bid Response documents signed and sealed by a Professional Engineer, Professional Geologist, Hydrologist or Soil Scientist licensed by the State of Wisconsin. Include the appropriate registration number of the professional license.
7. Bids can not be "faxed" directly to the program. Documents received by fax will not be accepted or considered.
8. Bids, amendments thereto or withdrawal requests must be received by the time advertised for bid opening. It is the bidder's sole responsibility to insure that these documents are received by the contact at the time indicated in this solicitation document.
9. All specifications or descriptive papers provided with the bid submission must include the bidder's telephone number and Commerce number thereon. Identify the name of the consulting firm on the 1st Page of the Bid Response.
10. The Commerce Number must be on the outside of the envelope in which the bid is submitted. The Department assumes no responsibility for unmarked or improperly marked envelopes. All envelopes received showing a bid number will be placed directly under locked security until the date and time of opening. Include only one Bid Response (an original and two (2) copies) per envelope.
11. Correction of errors on the bid form: All prices and notations shall be printed in ink, typewritten or computer printed. Errors shall be crossed out, corrections entered and initialed by the person signing the bid. Erasures or use of correction fluid will be cause for rejection. No bid shall be altered or amended after the time specified for the bid end date.
12. Bidders are not to contact other personnel located within the Department of Commerce/Bureau of PECFA concerning the site or the bid solicitation between the Bid Announcement Date and Bid Ending Date.
13. Any proposed technology or methods used in the remediation must be allowed for use in the State of Wisconsin and approvable by the Department with jurisdiction (Natural Resources or Commerce).

14. From the standpoint of program operations or regulatory responsibility, the Department determines it is in the best interest of the program to not accept any or all bids.
15. If bidders consider the bid response to be proprietary information and exempt from disclosure, each part of the Bid Response must clearly marked *CONFIDENTIAL*. If any part is designated as confidential, there must be attached to that part an explanation of how the information is proprietary. The Department reserves the right to determine whether this information should be exempt from disclosure and no legal action may be brought against the State, Department or its agents for its determination in this regard.
16. The Bid Response must be appropriate to the site geologic setting.
17. Ambiguous bids, which are uncertain as to cost, time or compliance with this solicitation, will be rejected.
18. The Department reserves the right to reject any and all bids, and/or to cancel this solicitation at any time.
19. Each bidder shall fully acquaint itself with conditions relating to the scope and restrictions attending the execution of the work under the conditions of this solicitation. The failure or omission of a bidder to acquaint themselves with existing documented conditions shall in no way relieve any obligation with respect to this bid.
20. All amendments to and interpretations of this solicitation shall be in writing from the Project Manager. Neither the Department nor the program shall be legally bound by any amendment or interpretation that is not in writing.
21. This solicitation is intended to promote competition. If the language, specifications, terms and conditions, or any combination thereof restricts or limits the requirements in this solicitation to a single source, it shall be the responsibility of the interested bidders to notify the program in writing so as to be received five days prior to the opening date. The solicitation may or may not be changed but a review of such notification will be made prior to award.
